Site Owner Guide (Draft)

Overview

This guide is the working owner reference for Sikhwari Group (Pty) Ltd website operations. It summarizes where key content lives, what guardrails apply, and how to generate a repeatable screenshot pack.

Updating legal identity placeholders

- Keep the legal company name as `Sikhwari Group (Pty) Ltd` where legal identity is shown.
- Update registration/contact placeholders only in shared legal identity components so footer, contact, and legal pages stay in sync.
- Avoid adding marketing claims into legal identity blocks.

Services content guardrails

- The services page must maintain these exact MOI division names:
  - Telecommunications, ICT, and Network Services
  - Cybersecurity Services
  - Proprietary Trading and Market Activities (Internal Capital Allocation)
  - Culinary and Hospitality Services
  - Software Development and Digital Services
- Trading is internal only: keep `Treasury / Internal` context in the heading, keep the trading disclaimer inline in the trading section, and include `Not offered as a public service.`
- Do not add public trading CTA language anywhere (including home, services, contact, or legal pages).
- Cybersecurity language should remain advisory/assessment/support and note legal/client authorization conditions where required.

Contact form behavior

- Home `Request a quote` routes to `/contact?intent=quote`, which preselects the form reason as `Request a quote`.
- Contact submissions are stored as leads in Prisma, including the selected `intent` and optional `serviceArea`.
- Server-side validation, anti-spam checks, and rate limiting apply before a lead is stored.

Admin and security baseline

- Baseline HTTP security headers are configured globally in `next.config.ts` and apply to all routes, including `/admin` and `/api`.
- Admin session cookies are hardened with `httpOnly`, `sameSite=lax`, `path=/`, and `secure` in production.
- Admin routes under `app/admin/(protected)` are server-protected and redirect to `/admin/login` before rendering when unauthenticated.
- Admin pages and `/api/admin/*` responses are marked non-cacheable (`Cache-Control: no-store`) to avoid storing sensitive admin data.
- Legal identity values (registration number and registered address) are environment-configured and no longer hard-coded in components.
- Proof items (certifications, partners, memberships, awards) are managed via `/admin/proof` and displayed on Home and About when active.

Abuse controls

- Admin login is rate-limited by IP and username, with a hard lockout after repeated abuse from the same IP.
- Lead submissions use server-side anti-spam controls: honeypot field, minimum submit-time check, and per-IP submission rate limiting.

SEO basics

- Route metadata is defined per page through existing metadata utilities.
- `app/sitemap.ts` defines sitemap entries.
- `app/robots.ts` controls crawler directives.
- Keep page titles/descriptions aligned with legal and services scope.

How to run screenshots

1. Install browser runtime:
    - `npm run screenshots:install`
2. Generate screenshot pack:
    - `npm run screenshots`
3. Output is written to:
    - `docs/screenshots/desktop/*.png`
    - `docs/screenshots/mobile/*.png`

Screenshots

The following images are generated from `docs/screenshots/...` and are embedded in the PDF export.

Privacy Policy

Last updated: February 24, 2026

This website collects personal information submitted through contact forms, including name, email address, phone number (optional), and message content. We also process basic website log information such as IP address and request timestamp for operational and security purposes.

We process this information to respond to enquiries, assess whether a consultation is appropriate, maintain communication records, and protect the website from abuse.

Enquiry records are stored as part of the website contact process and are retained for authorised internal business use only.

Default retention period: 24 months from last meaningful contact, configurable as business and legal requirements evolve.

In line with POPIA principles, data subjects may request access, correction, objection, restriction, or deletion where applicable. Rights requests can be submitted via the contact page and will be handled by the company representative.

We apply appropriate safeguards including controlled access, encrypted transport (HTTPS), and role-

appropriate handling procedures. Specific technical controls are not disclosed publicly for security reasons.
